### PRESS RELEASE

FOR IMMEDIATE RELEASE

#### **Westchester Joint Water Works To Undertake Five Water Main Improvement Projects**

**Mamaroneck, NY (September 9, 2011)** Beginning mid-September, the Westchester Joint Water Works will be undertaking water main improvement projects at five (5) separate locations within its service area and these improvements are expected to benefit water customers for years to come. The water main improvements are for the following locations:

- Taylor Lane (Village of Mamaroneck), installation of 1,300 linear feet of water main to the dead end.
- Davenport Road (Town of Harrison), installation of 200 linear feet of water main from Harrison Avenue to the dead end.
- Lundy Lane (Town of Mamaroneck), installation of 500 linear feet of water main full length of street.
- York Road (Town of Mamaroneck), installation of 1,100 linear feet of water main from Durham Road to Hilltop Road.
- Springdale Road (Town of Mamaroneck/New Rochelle), installation of two (2) seasonal booster pumps and associated water main improvements.

The first three projects are to be partially funded by a United States Environmental Protection Agency (USEPA) grant.

These scheduled water main improvements will address critical issues and will help to maintain the overall integrity of the water system in the future. The construction is expected to extend for a four (4) month period with minimal disruption to customers. To the extent that temporary disruptions may occur, the Westchester Joint Water Works apologizes for any potential inconvenience.
